

India's Trusted Provider of End-to-End Passive Telecom Infrastructure Solutions

www.customwrapsindia.com

The background of the right side of the slide is a composite image. It shows a city skyline at night with illuminated buildings. Overlaid on this is a semi-transparent map of the world. A network of glowing white lines connects various points across the globe, symbolizing global connectivity. The sky is a mix of dark clouds and a bright, hazy orange glow, suggesting a sunset or sunrise.

**Built to Connect.
Built to Last.**

Corporate **Mission**

To source, validate, and deliver mission-critical infrastructure solutions that meet the highest applicable national and international standards — enabling our clients to build networks, structures, and environments that perform reliably, at scale, and over the long term.

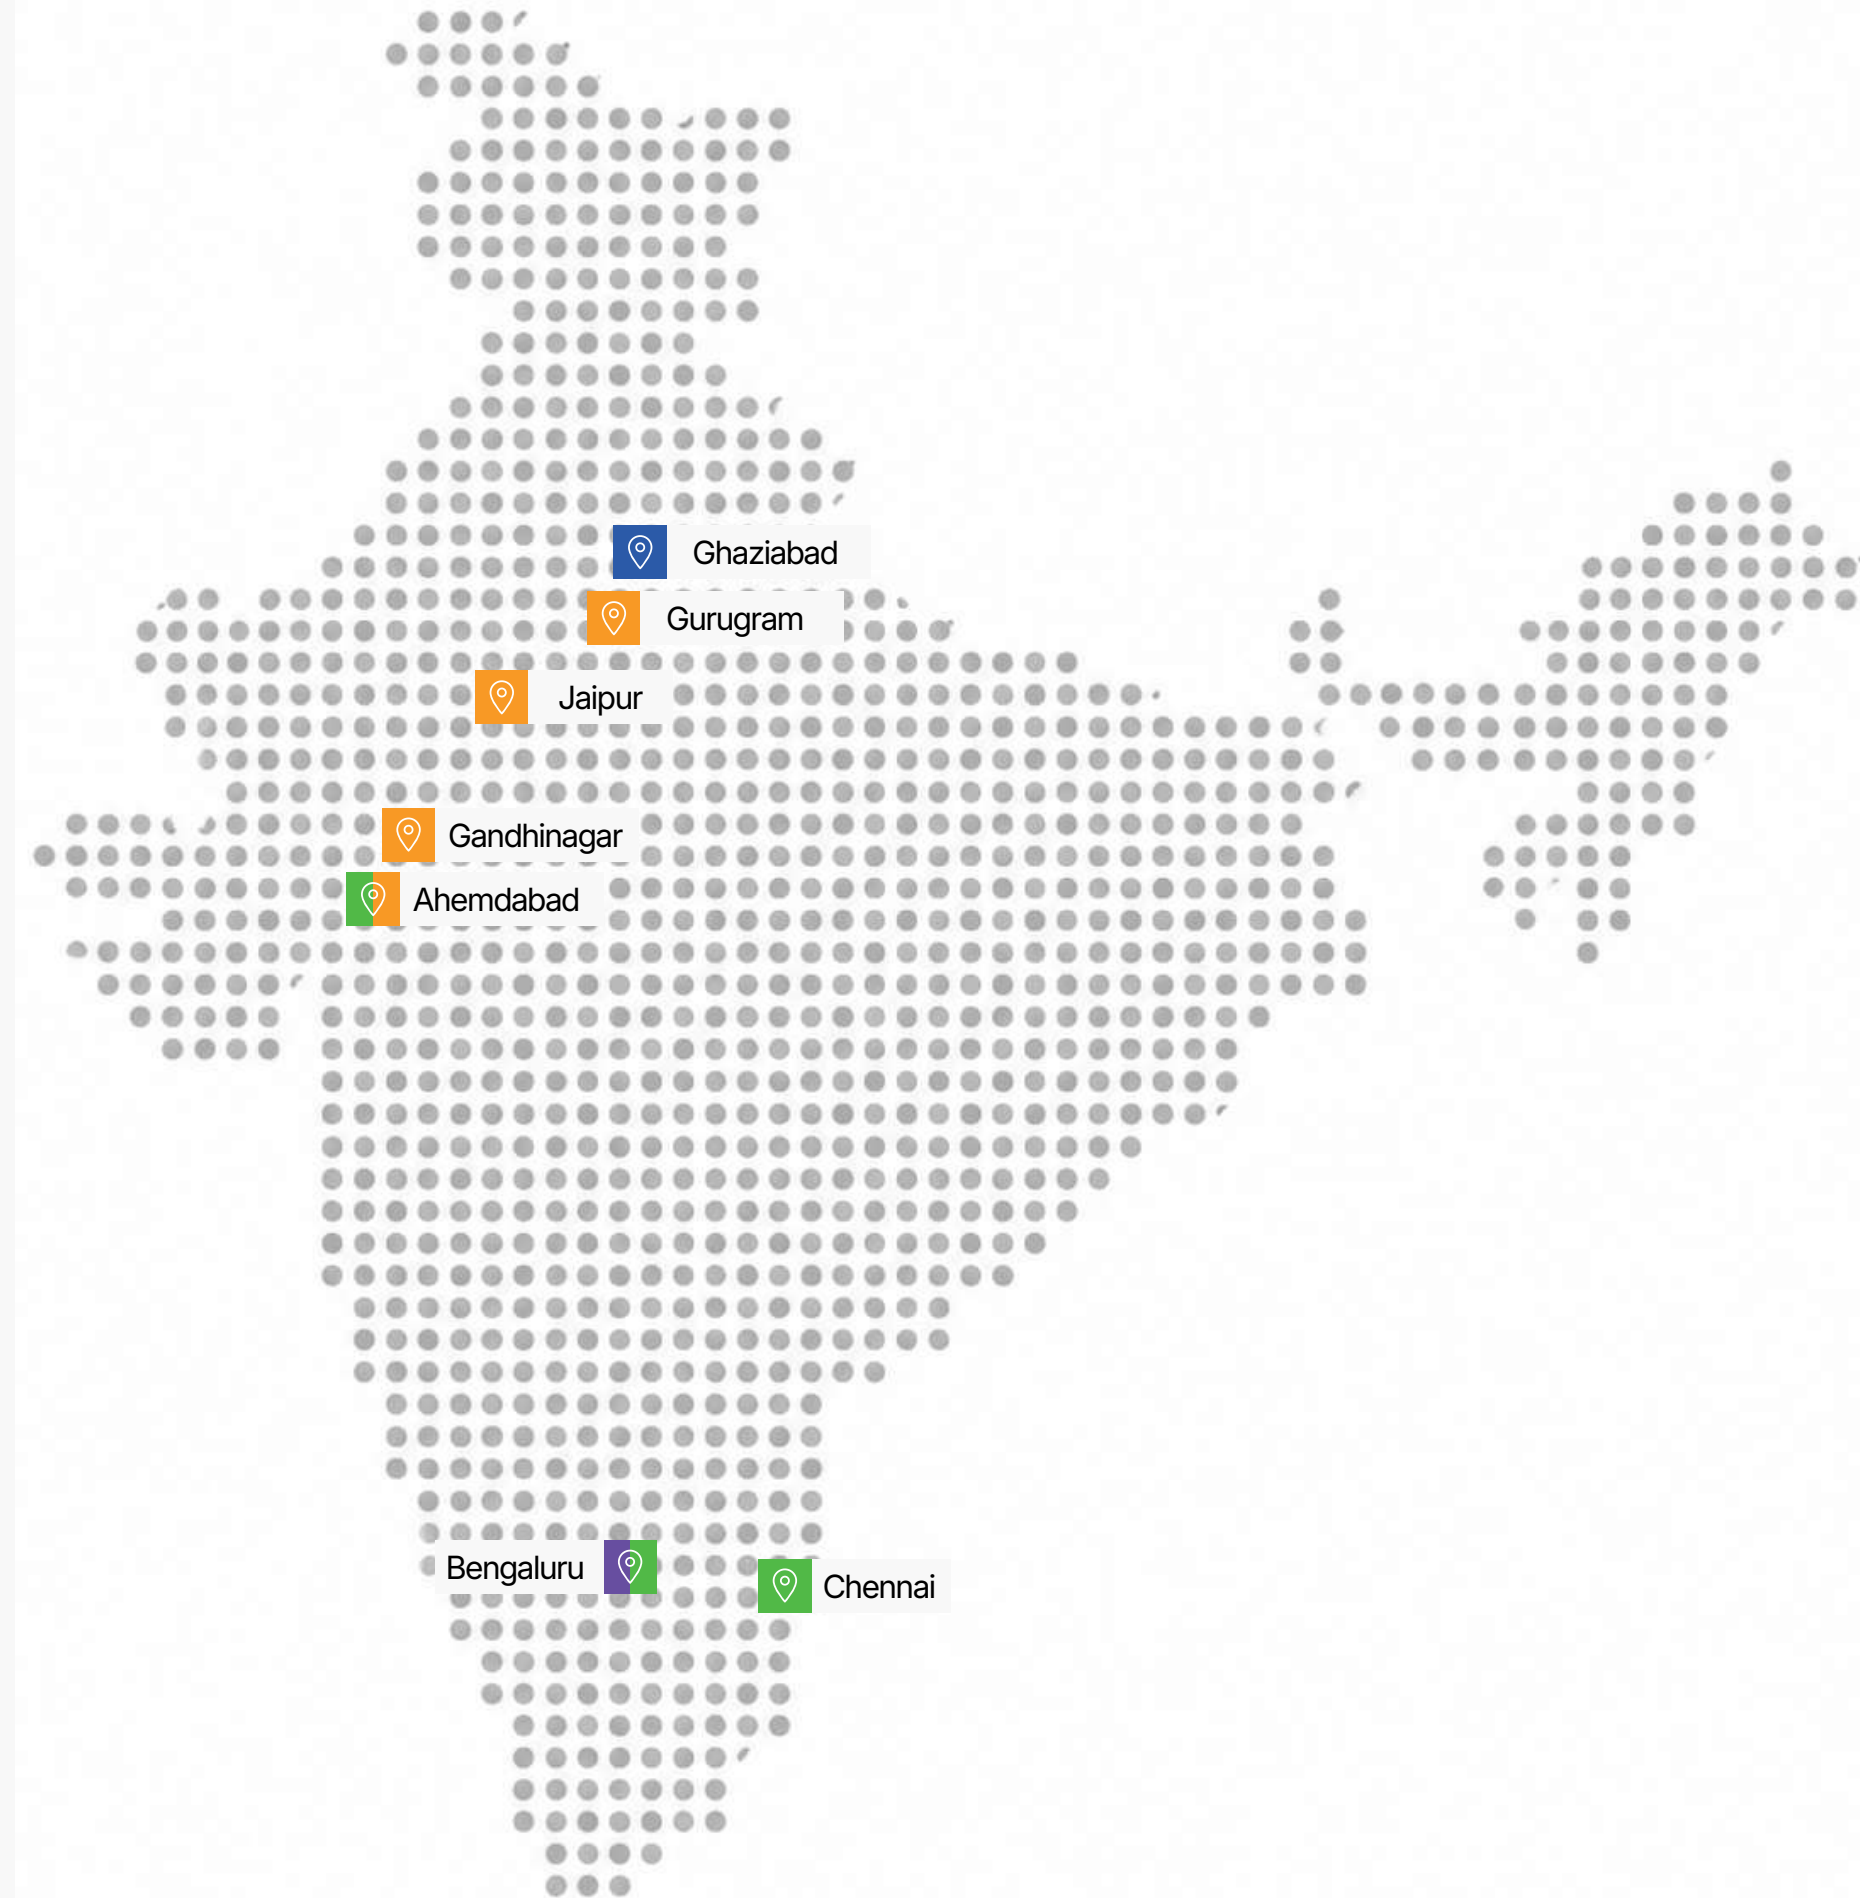

Engineering

Networks

National Presence

We are operating in 5+ locations in India

- HEAD OFFICE
- OPERATIONS
- R&D CENTRE
- MANUFACTURING & WAREHOUSING

What We Stand For

Principles that define partnerships we build

Integrity

Precise commitments. Transparent documentation.
Consistent delivery.

Technical Excellence

Every decision informed by deep technical knowledge
and application-specific understanding.

Partnership Over Transactions

We measure success by the quality of partnerships —
not order volumes.

Accountability

Full ownership of every commitment — from
specification to post-deployment.

Continuous Improvements

Continuously refined — because the infrastructure
landscape never stands still.

Innovator in Infrastructure Solutions

300+ Clients Across India

- Government and private corporations
- Manufacturing industries, hotels, hospitals, and airports
- Schools, universities, and high-end real estate projects

Leading Tier 1 Supplier — Passive FTTH Products, trusted by India's largest telecom operators

Manufacturing Capacity

- 25,000 Adaptors . 32% Global Demand

Prestigious Government Mandates

- Indian High Commissions, Parliament of India
- Romanian Embassy, Swedish Commission in Delhi

Key Institutional Deployments

- Dehradun & Raipur Airports
- AIIMS Bathinda & AIIMS Delhi
- Westin Hotels

Brand Promise

Built To Connect. Built To Last

We believe in precision, partnership, and the power of reliable infrastructure. "Built to Connect" is our commitment to delivering fiber, telecom, and signage solutions that keep India's networks running. "Built to Last" is our promise of quality — products engineered to perform for decades, not years. Together, these define how we work — with every client, every product, and every deployment.

Corrosion Resistant

Non-Conductive

Fiber Reinforcement Polymer

FRP Poles

FRP Poles meet the highest international standards, offering superior strength, corrosion and UV resistance, and long-lasting durability.

60% lighter than traditional steel and wood poles

50% reduction in manpower for transportation and installation

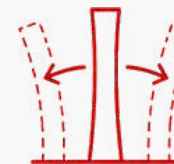

50% faster deployment speed

Absorbs twice the impact energy of wood and 10x more than steel

Service life of up to 80 years vs. 25–40 years for wood poles

Can deflect up to 40% without structural damage

Fiber Reinforcement Polymer

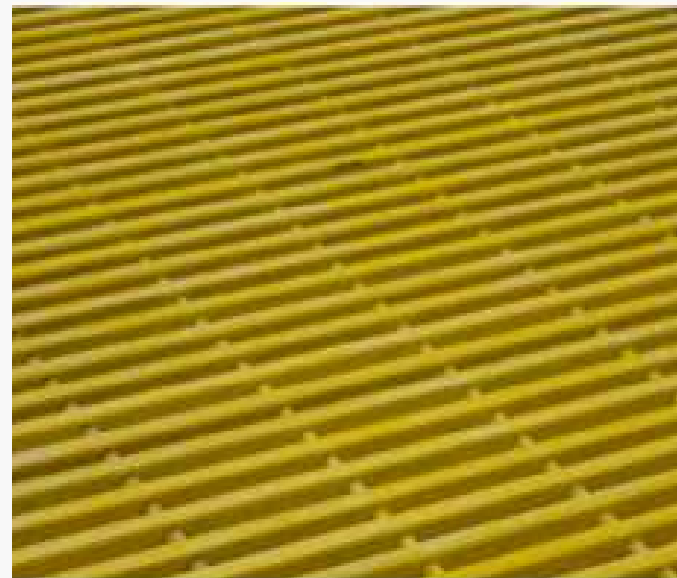

Fiberglass Product Range

Fiberglass
